

XBOSoft

XBOSoft, Beijing based with US management, is a full-service software testing company serving both the US and European markets. Founded in 2006, XBO has a proven record of success from Fortune 100 companies to small independent developers.

XBOSoft delivers a full range of testing services including automated testing, functional and regression testing, performance testing, web security testing, platform compatibility testing, localization testing, user experience testing, usability testing and web application testing. Our testing services can be carried out across all major operating systems, data bases, platforms, application servers and browsers.

XBOSoft offers several proprietary programs and tools such as our XBO ONE™ Automation Methodology to identify bugs early and reduce development lifecycles, XBO CommONE™ online client collaboration tool for secure 24/7 online access to project information, and XBO Quick Release™, the unique low-risk program for small businesses looking to outsource software testing.

The Client

AdminControl, a Norwegian online records management provider specializing in corporate due diligence and Board of Director online services, is based on the idea that business transparency is enabled through an on-demand document management system. Their web-based service offers organizations an advantageous, competitive edge in the marketplace.

“What I have seen so far is that you have done a great job!”

- *Project Manager, admincontrol*

Business Challenges

AdminControl seeks to simplify corporate governance through web-based on-demand services that support CEO communication with shareholders, Board members, and executives. They present services that proactively and strategically support the daily work of organizations and pinpoint areas that require improvement. A key benefit of this managed flow of information is an organization's ability to turn the law-imposed necessity of corporate governance into a considerable basis of competitive advantage.

AdminControl's application requirements are complex requiring access control, security, and global availability, 24/7. Finding their testing programs to be overbearing and expensive, AdminControl was left with the challenge of securing a firm that could handle their specific, detail-oriented, testing needs at a reasonable cost.

Solution: What it Means to Partner with XBOSoft

After identifying XBOSoft as a potential testing partner, AdminControl utilized XBO's FREE software assessment challenge. The assessment allowed AdminControl to experience first hand, the capabilities and services provided by XBOSoft and provided the confidence for AdminControl to go with XBOSoft Testing. XBOSoft's specialty and focus in complex application testing was exactly what AdminControl had been looking for. Currently, XBOSoft is working with AdminControl's development teams to provide a full suite of testing solutions including:

- **Functional Testing**
AdminControl's application must maintain streamlined functionality; XBO validates application conformity to specifications and all its required functions in a consistent, repeatable, and reliable manner.
- **Acceptance Testing**
AdminControl relies on their application's ease of use and acceptance among users. XBOSoft provides testing in "real world" environments to ensure the application is performing as designed.
- **Regression Testing**
Constant updates and releases of the AdminControl's product required XBOSoft to create a strategic plan for executing reliable and repeatable validation of each new release, ensuring that all defects are identified and corrected and that quality is maintained at the highest standard.
- **Privilege Escalation Testing**
Secure access control is a major concern for AdminControl. XBOSoft answers this with a multi-faceted testing strategy utilizing a variety of security tests and tools. This diversity of security testing is the best approach to identify pathways for unauthorized access and intrusions into a web based application.

- **Performance Testing**

AdminControl was apprehensive about how their applications would stack up to the competition in terms of speed and usability. XBOSoft tests for performance bottlenecks and provides valuable feedback to the development team for further product optimization.

XBOSoft's Advantages

- **Additional Time and Value**
Time and resources are always limited. XBOSoft has the resources and expertise necessary to handle a broad range of quality assurance and testing needs at affordable prices, allowing the customer to focus on what they do best, software development.
- **Benchmarking**
In our fast-paced, digital world, establishing and maintaining the highest performance standards for an application is a major key to success. XBOSoft creates benchmarks for the measurement, assessment, and analysis of application performance. When done right, this better ensures a product's competitive advantage in the marketplace.
- **Dedicated Team and Resources**
Due to our company's sole focus on software and application testing, XBOSoft is able to rapidly assemble dedicated teams, quickly develop a knowledge and understanding of complex applications and requirements, and deliver superior results.
